SECTION 5 – LOCAL EXCHANGE SERVICE, (CONT'D.)**5.3 Direct Inward Dial (DID) Service**

(N)

5.3.1 General

- A. DID Service provides a Customer with a voice grade telephonic communications trunk channel to receive incoming voice or data calls to local telephone numbers assigned to the Customer. DID Service does not provide a line-side connection. DID Service transmits the dialed digits for all incoming calls, allowing the Customer's incoming calls to be routed as required by the Customer to the Customer's designated equipment.
- B. DID Service may be provided in conjunction with non-regulated services offered by the Company pursuant to contract. To the extent that contractual rates for DID Service differ from those set forth in Section 5.3.3 below, they will be subject to the terms of the Individual Case Basis arrangements set forth in Section 8.2 of this tariff.

5.3.2 Service Eligibility, Restrictions and Limitations

- A. The Customer must subscribe to a minimum of 20,000 DID numbers in each state in which it requests DID Service.
- B. Connectivity to E911, operator services and directory assistance is not supported by DID Service.
- C. The Company reserves the right to provision DID service based upon the availability of facilities and equipment necessary to support the Customer's specific service requirements.
- D. The Company, at its sole discretion, reserves the right to limit the quantity of DID number blocks a Customer may obtain. Requests for 30 or more DID number blocks must be provided to the Company in writing no less than five (5) months prior to activation. In addition, the Company reserves the right to review vacant DID stations or stations not in use to determine their utilization. Should the Company determine, based on its own discretion, that there is inefficient number utilization, the Company may reassign the DID numbers.
